TIPS AND RECOMMENDATIONS FOR INSPIRATION

PREPPING IN CHOCOLATE WARMING CABINET If you are working with large quantities of INSPIRATION, we recommend placing them in a Chocolate Warming Cabinet similar to a white chocolate for use the following day. Even with this precaution, the product's texture may thicken slightly. It will regain its initial appearance after light beating with a spatula, in an immersion blender, or in the mixer of a tempering machine.

MOLDING Make your molded products as close to the date you intend to use them as possible, and make sure you rotate the items in your displays. After you have made them, store your molded products at 60-65°F (16-18°C) away from sunlight. We recommend a four-week use-by date for molded products made using INSPIRATION.

CONSERVATION Store 3kg bags in a cool, dry place between 60-65°F (16-18°C).

PASSION / STRAWBERRY BAHIBÉ BONBONS

An original recipe by Romain Grzelczyk, Pastry Chef, L'École Valrhona *Yields 240 3cm bonbons*

PASSION FRUIT / STRAWBERRY BAHIBÉ GANACHE

- 500 g **passion fruit / strawberry purée**
 - 500 g **sugar**
 - 50 g **glucose**
 - 385 g **BAHIBÉ 46% COUVERTURE**
 - 150 g **European butter**
 - 1200 g **PASSION FRUIT INSPIRATION**
or
1200 g **STRAWBERRY INSPIRATION**
- Cook the purée, sugar and glucose at 220°F (104°C).
 - Stop cooking and let the temperature fall to 165-175°F (75-80°C).
 - Slowly pour this hot mixture over the melted BAHIBÉ 46% couverture. Immediately mix using an immersion blender to make a perfect emulsion.
 - As soon as the mixture is at 95°F (35°C), add the butter and mix with an immersion blender.

ASSEMBLY AND FINISHING

Use a spray gun and spray gun mixture which you have pre-set at 85°F (30°C). Partially spray the half-sphere molds. Scrape off any excess and leave to harden. Then use as a mold for the PASSION FRUIT or STRAWBERRY INSPIRATION. Turn over and leave to spread for a few moments, then smooth away any excess. Drain the molds by holding them suspended over two rulers. Before they harden completely, trim any excess off the half-spheres. Leave to harden. Use a piping bag to fill the half-spheres with Ganache. Make sure that the temperature of the Ganache is below 80°F (28°C). Leave to harden for 24 hours at 60°F (17°C) and a 60% relative humidity level. To seal the chocolate bonbons, use a heat gun to soften the edges of the half-spheres, then close off the hole with tempered BAHIBÉ 46% couverture. This way, the joints will be seamless.

Tip: For chocolate bonbons with totally smooth bases, apply a fine layer of tempered PASSION FRUIT or STRAWBERRY INSPIRATION then immediately cover with acetate paper and press down, making sure to remove any air bubbles using a thin spatula. Leave to harden at 60°F (17°C) then turn out.
